

ASV Platforms Partners with imei for Unified SASE as a Service in Australia and New Zealand

AI driven SASE platform from Aryaka meets needs of improved secure networks, performance with less cost and complexity among enterprise and government customers

Sydney, Australia, August 6th, 2025 – ASV Platforms as the exclusive partner for Aryaka Unified SASE as a Service in Australia and New Zealand, today announced a partnership with imei for Corporate and Government enterprises. imei is a leading Australian communications services company that specialises in Unified Communications, Data Network services and Managed Services. imei is also a Telstra Platinum partner with a strong focus on customer satisfaction, with a Net Promoter Score consistently over +80

ASV Platforms provides cloud-first secure cyber and networking solutions to enterprises and government customers. The partnership with imei gives clients local access to Aryaka's Unified SASE as a Service high-performance secure networking platform and new AI investments.

Aryaka's award-winning Unified SASE as a Service enables organisations to consolidate network vendors, simplify operations, eliminate integration costs, reduce vendor management overheads, improve application performance and security posture.

Ian Woollett, Chairman of ASV Platforms said: *"We're excited with imei to bring the market leading Unified SASE as a Service solution to this region, helping our business and government customers achieve unparalleled network performance, security and reduce operational costs. Aryaka's technology combined with newly simplified packaging and Australian pricing makes it easier for customers to secure and modernise their networks and simplify operations."*

Tim Fussell – imei CEO and Founder added: *"imei is expanding its secure networking products and services, and our partnership with ASV Platforms and Aryaka combined with imei's strengths in managed services and customer satisfaction means broader, better served and more secure choices for our clients' communications"*

Aryaka's AI investments enable high-performance and secure use of AI and Generative AI (GenAI) applications across multiple networks. The approach consolidates a client's cyber investment, while modernising legacy networking assets using a SASE approach, that now has new security, and cyber observability services all through a local Australian 24/7 365 service desk powered by imei. Aryaka SASE as a Service is available now.

About ASV Platforms

ASV Platforms is the strategic partner for Aryaka across Australia and New Zealand servicing government organisations and enterprises. Our mission is to provide businesses in Australia and New Zealand with the opportunity to transform their network and consolidate cyber technology investments.
